OPSENS RECEIVES ISO 9001:2000 CERTIFICATION

Quebec City, Quebec, October 20, 2008 – Opsens Inc. (“Opsens” or “the Company”) (TSX-V: OPS) announced today that it has received ISO 9001:2000 certification, formally recognizing its systematic approach to quality management, and processes that are customer-focused.

“This certification demonstrates our commitment to delivering only the finest quality products and services,” said Pierre Carrier, president and chief executive officer of Opsens. “It confirms to our customers that Opsens has the necessary internal controls and processes in place to be a leading supplier.”

“We are providing consistently high-quality fibre optic sensors that meet the stringent requirements of our clients in the medical devices, oil sands, scientific and military research and high-power transformers markets,” Mr. Carrier said.

“This designation reflects the strength of the entire Opsens team, led by Mr. Richard Van Neste, director of manufacturing, in this achievement,” Mr. Carrier said.

The International Organization for Standardization, based in Geneva, is a non-governmental organization that has developed a series of best practices that set standards to facilitate global trade. The ISO 9001:2000 standard covers topics such as management’s commitment to quality, adequacy of its resources, and process management for manufacturing.

ISO standards are widely respected and accepted by public and private sectors internationally. Opsens’ certification was performed by Intertek Testing Services Na Ltd.

About Opsens Inc. (www.opsens.com)

Opsens is a leading developer, manufacturer, and supplier of a wide range of fiber optic sensors and associated signal conditioners based on proprietary patent and patent-pending technologies. Opsens sensors provide long-term accuracy and reliability in the harshest environments. Opsens provides sensors to measure pressure, temperature, strain, and displacement to original equipment manufacturers (OEM) and directly to end-users in the oil and gas, medical instrumentation, energy, and scientific and military laboratory fields. Opsens offers technical services, such as on-site installation, training, and turnkey fiber optic systems.

The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.
